

RAINIER | ELEVATION

RETRACTABLE SHADING SYSTEMS

UNIQUELY DESIGNED

The unique articulating arm wrist allows for maximum unit movement to help prevent wind damage

Adjustment pitch shoulders, for greater sun control and use in light rain conditions

BUILT TO LAST, PROFESSIONALLY INSTALLED

The Rainier Elevation is the ultimate solution for achieving superior solar control with a retractable awning. It provides unmatched freedom and flexibility, enabling you to modify the pitch of the unit according to your evolving requirements, thereby offering different degrees of sunlight control throughout the day. Each arm shoulder has a manual adjustment that is controlled with a removable hand crank. With a simple turn of a crank handle, you can increase privacy or protection from the elements. The Elevation also incorporates a uniquely designed arm wrist that will adjust to changing weather conditions, helping to prevent damage from sudden wind gusts.

Built with precision and attention to detail, our shading products are custom-made in America and professionally installed to perfectly fit your individual needs. Choose from a wide selection of Sunbrella Outdoor Shade fabrics to complement your decor, knowing that you are protected with a 10-year warranty against rot, mildew, or excessive fading. For easy and reliable operation, the Elevation is equipped with motors and electronics from Somfy — a world leader in home automation technology. Plus, its non-corrosive framework features stainless steel fasteners for long-lasting functionality and effortless maintenance. Trust the Elevation awning to enhance your outdoor living experience while also adding value to your home.

PRODUCT OPTIONS

VALANCE STYLE

Awning valances are an essential element to consider when selecting the perfect awning for your outdoor space. A valance, or the decorative border on an awning, not only adds a stylish touch but also serves various functional purposes. They help to protect against sun glare and offer extra shade and privacy. When it comes to choosing the right valance style and fabric, there are several factors to consider. With Rainier, you can choose from up to 6 different valance styles. Each style has its unique appeal and can complement different types of architectural designs.

MOOD LIGHTING

Add a unique element to your evening entertaining with several lighting options. Lunar Lighting (shown) is typically applied to the back of the front bar and offers a soft warm glow light which can be turned on or off with the same multi-channel remote/transmitter as your awning. An LED lighting option is available with light strips applied to the arms of the awning. This UL-listed LED light kit offers 16 levels of light in either warm or cool lighting.

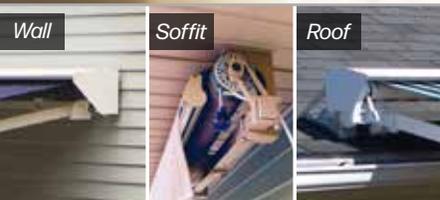

ELECTRONIC ACCESSORIES

Our world-class wireless components make operating your shading system effortless.

Wind Sensor: This motion sensor attached to the awning's framework will retract the unit if it gets too windy — adding a level of safety and security.

Sun Sensor: This sensor, typically mounted to an exterior wall, will automatically extend the awning once the preset sun level is attained, and will automatically retract your shading system when the sun passes.

TaHoma: With TaHoma®, create scenarios to link your connected devices and activate them with just a click on your smartphone!

MOUNTING OPTION

Rainier offers the Elevation in three different mounting options — Wall, Soffit and Roof Mounted — to best fit your installation requirements.

SUNBRELLA SHADE FABRICS — FROM SERENE TO STUNNING

Rainier offers a wide array of long-lasting, fade-resistant, 100% acrylic fabrics from Sunbrella. The Sunbrella Shade fabrics are specifically made for heavy-duty applications such as retractable awnings. Each fabric cover is computer cut, has ultrasonically sealed edges, and is sewn with Tenera thread to provide a full 10-year warranty on the fabric and the seams. "Make a bold statement or blend harmoniously to your home's décor..." whatever your choice, we have the fabric for you.

AN ADDED LEVEL OF SECURITY

Looking for a lifetime warranty on your complete shading system — from frame to fabric, motor and electronics? Ask your dealer for complete details on our platinum protection programs.

PRODUCT FEATURES:

FLEXIBLE PITCH ANGLES

You can adjust the angle of the Elevation unit to meet your changing needs. With a turn of the pitch adjustment crank, you can change the front angle of the unit. You can also raise or lower the front bar by adjusting all shoulders.

High pitch with even front bar

Low pitch with even front bar

Uneven pitch with bar angled left

Uneven pitch with bar angled right

SIZES AVAILABLE

The Rainier Elevation shading system is custom-made to fit your unique space. With widths up to 29' wide and projections up to 12', we've got you covered!

DUAL CABLE ARM TENSION SYSTEM

This innovative design utilizes two sturdy stainless steel cables that run through the arms of the awning, providing greater stability and tension than traditional single cable systems.

MOTORIZED

Easy motorized, touch of a button operation. Includes the functionality of a manual override feature should you lose power.

HARDWARE COLOR OPTIONS

White (RAL 9016) is the standard frame color for the Rainier Elevation. Because we control the entire production process of this unit, including in-house powder coating, we can custom build the unit's frame and optional hood in 17 premium colors or match a RAL color. Please consult your dealer for complete details.

STANDARD PRODUCT WARRANTY*

- 10 years on frame
- 10 years on fabric
- 8 years on motor & electronics

*Please review warranty for complete details
